

# POVERTY AND INTIMIDATION IN MADAGASCAR

Madagascar is famous for its splendid nature and exotic animals. But this beauty hides a reality of severe, endemic poverty and labour rights violations.

Madagascan dock workers are some of the lowest paid in the world. Some earn less than US\$40 per month. Workers struggle to support themselves and their families despite long hours doing difficult, dangerous work.

When they came together to fight for an end to precarious, low-paid and unsafe working conditions - they were sacked.

**Now they are fighting back, and asking you to stand with them.**

---

Join us and tell the Madagascan Government to stand up for workers' now.
